

## LPCXpresso Hardware Offers

Embedded Artists wish to reward customers who buy an LPCXpresso board with some great offers.

When you buy an LPCXpresso board you will receive a unique coupon code printed on the flyer received together with the board. Using this code in Embedded Artists' web shop gives you **15 EUR** discount on Embedded Artists' regular **Developer's Kits** see:

<http://www.embeddedartists.com/products/kits/>.

The coupon code also gives you **7 EUR** off the **LPCXpresso Base board**.

If you wish to buy both the LPCXpresso board and the Base board at the same time you can choose to buy the **LPCXpresso Kit**. The kit is **7 EUR** cheaper compared to if you buy the parts separately. No coupon code is needed when you buy the LPCXpresso kit.

### Constraints:

- The coupon code is printed on the flyer received together with the LPCXpresso board.
- Discount is only given for one (1) kit and one (1) Base board per valid coupon code.
- The 15 EUR discount is not valid for the LPC1768 Developer's kit.
- The discount is given in EUR.
- The coupon code can only be used in Embedded Artists' web shop. In the web shop you enter your coupon code in the field "Coupon Code" during the checkout process.
- The offer cannot be combined with other campaigns.

## LPCXpresso Upgrade Offers

Code Red Technologies has some exciting upgrade options only available to registered users of LPCXpresso.

By upgrading to Red Suite, additional features are provided that are not available in the LPCXpresso free edition. These features include:

- Support for all NXP LPC microcontrollers
- Increased, or unlimited, code size
  - Depending on product purchased
- Integrated Flash programming utilities
- Red Trace on Cortex-M3 based parts

When used with Cortex-M3 based Microcontrollers, the integrated Red Trace functionality gives the developer an unprecedented level of visibility into what is really happening on the target device. Unlike traditional trace solutions, Red Trace is a non-stopping technology that continues to gather information completely non-intrusively as the target code executes. Red Probe is required for Red Trace.

### Upgrade offers

- Red Suite for LPCXpresso LPC256 : \$256
  - Full featured Red Suite supporting all LPC parts up to 256KBytes
- Red Suite for LPCXpresso LPC512 : \$512
  - Full featured Red Suite supporting all LPC parts up to 512KBytes
- Red Suite and Red Probe bundle: \$895
  - Supports unlimited code size on all LPC1000, LPC2000, LPC3000 as well as supporting other vendors MCUs
  - Red Probe enables Red Trace functionality

Full details on our products and upgrade offers can be found by visiting
